Passionate about end-to-end ML delivery — from requirements and design through deployment and governance.

Experience

Kyndryl Malaysia Sdn. Bhd. Jun. 2025 – Present
Associate, Infrastructure Specialist (Data Scientist) Kuala Lumpur, MY

Project: AI email processing pipeline — auto-financing loan applications

- Led end-to-end design of an AI automation pipeline, **reducing manual loan review time by 70%** through intelligent document processing using Azure Document Intelligence (OCR + NLP) for NRIC, payslips, and bank statements
- Built cross-validation logic comparing extracted fields (name, NRIC, income, employer) across document types, flagging mismatches with confidence scores and generating **audit-ready compliance reports**

Project: Clinical genomics report verification & evidence retrieval

- Implemented an LLM-assisted RAG workflow retrieving live evidence from clinical databases (OncoKB, ClinicalTrials.gov), **reducing manual variant review effort by ∼60%** with full audit provenance
- Built automated batch pipelines validating variant calls across **multiple clinical reports**; wrote reconciliation tools comparing legacy tiering outputs with updated evidence

Universiti Malaya × SkyWorld Development Berhad Apr. 2024 – Mar. 2025
Chatbot Developer (Final-Year Project) Kuala Lumpur, MY

- Developed a production-ready multilingual chatbot using mBERT and SeaLLM for NLP-based intent classification and sentiment analysis across Malay, English, and Mandarin inputs
- Engineered aspect-based and hierarchical sentiment analysis (3-tier and 5-tier) with VADER fallback; designed modular FastAPI + MultiLLM architecture trained via Hugging Face

Setel Ventures Sdn. Bhd. (PETRONAS subsidiary) Aug. 2023 – Feb. 2024
Intern, IT Operations Kuala Lumpur, MY

- Provided L1/L2 IT support; managed SaaS platforms and cloud administration (Google Admin, JumpCloud, PowerShell); coordinated IT audit sessions with structured compliance documentation
